
activemoney™

ActiveMoney is an all-in-one solution for finding and securing money for your small business.

While many money-finding resources simply list a series of programs that may or may not pertain to your business, ActiveMoney is different.

Sure, there are more than 400 public and private sources of capital for you to discover, but thanks to its Interactive MoneyFinder, it can help you develop what you really need: a capital strategy.

And once you've crafted your strategy, ActiveMoney can help you find just the right sources of money based upon how much you need and what you need it for.

But as everyone knows, having a strategy is one thing, executing it is another. That's why we have included a number of tools to help you bring your strategy to life including: loan amortization calculators, business planning guides, financial projection spreadsheets, loan applications, financial worksheets, process checklists, and more.

Best of all, ActiveMoney comes on a mini cd-rom that will fit right into the same place your new found money will: your wallet.

To request a free copy of the ActiveMoney CD please call the Bloomington Economic Development Corporation at 1-800-319-2983 or email your request to lwilliam@bedc.bloomington.in.us.
